

# 9<sup>th</sup> International Symposium on Software Engineering for Adaptive and Self-Managing Systems

**SEAMS** is the leading international forum for presenting and discussing novel ideas, innovations, trends, and experiences in engineering software with self-managing and self-adaptation features.

The symposium's objective is to bring together researchers and practitioners from many of the diverse areas who have an interest in adaptive software to investigate, discuss, and examine thoroughly the fundamental principles, state of the art, and critical challenges of self-adaptive and self-managing systems.

If you want to participate and join us, visit our website for more information: <http://seams2014.uni-paderborn.de>

**General Chair:**

Gregor Engels, University of Paderborn, Germany

**Program Chair:**

Nelly Bencomo, Aston University, UK

**Publicity Chair:**

Markus Luckey, University of Paderborn, Germany

**Steering Committee:**

Luciano Baresi, Politecnico di Milano, Italy

Betty H.C. Cheng, Michigan State University, USA

Rogério de Lemos, University of Kent, UK

David Garlan, Carnegie Mellon University, USA

Holger Giese, Hasso Plattner Institute, Germany

Marin Litoiu, York University, Canada

Jeff Magee, Imperial College, UK

Hausi A. Müller (Chair), University of Victoria, Canada

Mauro Pezzè, University of Milano Bicocca, Italy and University of Lugano, Switzerland
